INSTALLATION GUIDANCE

SELECTION & SPECIFICATION DATA

Туре	Novolac epoxy tile adhesive	Reference Specifications	CES-302 Installation of chemical resistant brick flooring using the bricklayer's method of construction and direct bond technique		
Description	Thinset Novolac Adhesive - Silica is a 100% solids, 3-component silica-filled novolac epoxy tile and floor paver adhesive.		CES-309 Installa	ation of corrosior the tile setter's m	n-resistant
Uses	High strength bonding adhesive for tile, ceramic, brick, pavers, masonry and steel plates in food, beverage, pharmaceutical and chemical process		CES-311 Installa	ation of Tufchem	Tiling Systems
	areas subject to:	Installation Conditions	for ideal handlin	c Adhesive - Silica ng at 70°F (21°C). d be acclimated t	Materials and

	 Enhances thermal shock resistance of bonded tile and pavers Low odor Excellent handling Damp surface tolerant 	Ratio	and 90°F (32°C) following mix ra	, use 6711 Harde	
				ner by volume (li	
Limitations	 Not suitable for vertical wall tile applications. Consult with ErgonArmor for wall tile applications. 		For installation temperatures between 35°F (2°C) and 50°F (10°C), use Epoxy Cold Room Hardener at the following mix ratios:		
	 Not for use beyond its chemical resistance or thermal capabilities. Consult ErgonArmor with specific questions. 		 1.0 resin: 0.16 hardener: 2.4 filler by weight 5 resin: 1 hardener by volume (liquids only) Pour measured quantity of resin into clean, dry mixing vessel. Slowly add measured quantity of hardener to resin and mix thoroughly. After liquids are mixed completely, add filler and mix until filler is thoroughly wetted and adhesive is creamy, free of lumps and trowelable. 		
		Mixing			
		Work Life	30-40 minutes at 70°F (21°C).		
			Work life is shorter at higher temperatures. A larger volume of mixed material will have a shorter work life than a smaller volume.		
		Cleanup	Xylene or methyl ethyl ketone (MEK)		
		CURE TIME			
		Brick or Tile Temperature	Initial Set	Heavy Traffic	Full Cure
		70°F (21°C)	4-6 hours	36 hours	7 days

thickness.

A 143 lb (1.3 ft³) unit consists of 1 case of resin, 1 case of 6711 Hardener,

When using Epoxy Cold Room Hardener, 111 lb (1 ft³) of mixed material consists of 1 case of resin, 5 lb of Epoxy Cold Room Hardener and 75 lb of

Packaging

4 x 7.8 lb (0.8 gal) can case

4 x 4.0 lb (0.5 gal) can case

2.5-gal (9.5 L) 20 lb (9.1 kg) jerrycan

48 lb (21.8 kg) bag

A 143 lb unit will cover 125 sf (11.6 m²) at 1/8-inch

(3.2 mm) or 150 sf (13.9 m²) at 3/32-inch (2.4 mm)

111 lb of Thinset Novolac Adhesive - Silica with Epoxy Cold Room Hardener will cover 96 sf (8.9 m²) at 1/8-inch (3.2 mm) or 120 sf (11 m²) at 3/32-

Storage & Maintain products in original packaging and sealed until ready for use. Estimated shelf life is 12 Shelf Life months when stored in a dry area at 70°F (21°C). Actual shelf life may vary with storage conditions.

If there is any question with respect to the quality of the components, check reactivity prior to use. For assistance consult with ErgonArmor.

SAFETY

Mixes and applications of this product present a Safety number of hazards. Read and follow the hazard information, precautions and first aid directions on the individual product labels and safety data sheets before using. Provide thorough air circulation during and after Ventilation application until the material has cured when

used in enclosed areas.
